

## Why SOLARA M-Series modules

The only nautical module line which is completely  
**“Made in Germany”**

- steel plate with two layers of powder coating
- sea and salt water resistant, no corrosion
- slightly curvable and walkable
- six different sizes, from 12Wp up to 68Wp

Successful used for many professional applications like measurement bouys, Tsunami bouys and life boats. Self-cleaning high-tech surface, non slippery due to structured surface, very robust cable outlet, triple security with screwing, glueing and potted against humidity

Wave scan buoy
